# NUMA for Silicon Sentier

The NUMA project is a conversion of a commercial building into a place that will be experimental in nature due to the type of activities it will host. Organised around collective and communal entities, it has two unifying spaces. The first, on the ground floor, has a large area opening onto the street, a café and an entirely flexible reception space. Due to this necessarily changing configuration it will be a multi-purpose space. The second space, on the top floor, is designed to host conferences and receptions and has a large terrace. The work spaces are organised between these two levels.

NUMA, head office of Silicon Sentier, a business incubator, co-working and project development facility based on innovation and new technologies and a café in Paris.

◀ Transformation of a building.  
▲ Entrance on rue du Caire.

▲ Shared workspaces.

▲ Shared workspaces.

◀ Shared workspaces.

▲ Upstairs, shared workspaces.

▼ On the groundfloor, workspaces open to all.

▲ ▼ On the upper floor, seminar room.
